

Canada's Voice for
Brownfields Redevelopment

May 2018 Newsflash #7

CBN 2018 Conference

Last Chance to Pre-Register for CBN's Conference, the **MUST ATTEND** Brownfield Event of the Year!

Today is your last chance to pre-register for CBN's 2018 Conference *National Brownfield Summit: Charting the Future*, being held Wednesday, June 13 at Oakham House, Ryerson University, Toronto.

Why are we calling the **MUST ATTEND** brownfield event of the year?

Because this year's Conference is our industry's opportunity to recognize and expand the role of brownfield reuse, become aware of recent regulatory changes regarding excess soils, learn about emerging technologies, and plan the future agenda for brownfields in Canada.

Our agenda this year covers the following:

- **Keynote:** The Role of Brownfields in Solving Canada's Affordable Housing Crisis
- **Emerging Technology:** An overview of four technologies that are changing remediation practice in Canada
- **Legal Update:** A summary of key developments in case law in the past year, and what they mean to us
- **Cross-country Check-up:** This year's edition of this popular session focuses on new/proposed regulation of excess soils
- **The Brownfields Industry In Canada: State of the Union:** Join us as we look at where brownfields were 15 years ago and how they have progressed, and contribute your insights as we chart the course for the future
- **HUB Awards:** Help us celebrate individual excellence of our colleagues in the industry
- **Networking Reception:** Relax and network with other brownfielders after a full day's work

The full Conference program is available [here](#), and you can register [here](#).

Introducing Tread - Sponsors of the Cross-country Check-up

CBN is pleased to welcome Tread as a first-time Silver sponsor, sponsoring the Cross-country Check-up. Tread is a construction management platform that makes it easier for companies to hire and manage equipment subcontractors, and for equipment owners to utilize their fleets. Tread does this by deploying a GPS tracking app to any equipment operator's phone running iOS or Android, allowing for lean deployment across all internal and external operators. Tread uses that data to provide logistical, compliance and business insights for contractors, qualified professionals and governments, all while reducing reliance on paper receipts and cumbersome backend processes. Tread is the only tracking system that is built from the ground up with business and regulatory relationships in mind.

For more information about Tread, please visit their [website](#).
