Atlantic PIRI releases new online Ecological Screening Protocol training module

The Atlantic Partnership in RBCA Implementation (PIRI) provides Atlantic Risk-Based Corrective Action (RBCA) software and technical user guidance training.

On August 1, 2013, Atlantic PIRI released the Ecological Screening Protocol for Petroleum Impacted Sites in Atlantic Canada online training module. This module can be taken as a supplement to the Introduction to Atlantic RBCA Version 3 online course or as stand-alone training and will take about 1.5 hours to complete. Upon successful completion, participants will receive a certificate of completion with 1.5 professional development hours.

The online training is self-paced and reinforces learning with knowledge checks and a case study at the end of the module.

What is in the Module?

The Ecological Screening Protocol for Petroleum Impacted Sites in Atlantic Canada online training module aims to provide industry members and consultants with knowledge of the basic principles and concepts of ecological screening within the Atlantic Canada regulatory context.

The online module, sanctioned by Atlantic PIRI, provides participants with an opportunity to:

- Assess petroleum hydrocarbon hazards.
- Identify habitats and ecological receptors.
- Identify exposure pathways for habitats and ecological receptors.
- Conduct the screening protocol efficiently and consistently.
- Complete a final case study.

The module costs \$95 excluding taxes and is available at a reduced cost to those who have previously taken the Introduction to Atlantic RBCA online course.

CBN would also like to thank those Directors who retired from the Board for their support and assistance:

- **Terry Boutilier**
- **Jeanette Southwood, P. Eng.** - Global & Canadian Sustainable Cities Leader, Golder Associates Ltd.

WORKSHOP: BROWNFIELDS REMEDIATION - WHAT'S NEXT

CBN, in conjunction with HazMat Management magazine and the Environmental Risk Information Service (ERIS), was pleased to present the workshop Brownfields Remediation, "What's Next" in Toronto on June 18, 2013. The workshop had a great turnout and excellent content for brownfields professionals. We'd like to thank everyone involved, especially HazMat Magazine and the presenters.

Sessions at the workshop included:

- CBN Updates and Committee reports
- FCM brownfield funding updates
- Modified Generic Risk Assessment and Tier 3 Streamlined Risk Assessments in Ontario
- Case examples of streamlined risk assessment and brownfields
- Implementing the brownfield regulation and meeting stakeholder expectations
- Soil and groundwater standards, verification and laboratory uncertainty
- The SuRF Program
- On-site remediation innovations - case studies

To view the presentations, please visit the [Hazmat Magazine "Events" website](#) and enter the password "cbn2013" (without the quotation marks).
